Executive Summary

The summary below is based on residential sales in Harrisonburg and Rockingham County as reflected in the HRAR MLS.

Pace of Home Sales: September

79 homes sold in September 2013, showing a 18% increase over September 2012 when 67 homes sold -- and no change from September 2011 when 79 homes sold.

Home Values: September

Median sales prices stayed level and average sales prices declined 0.74% when comparing September 2013 to September 2012.

Days on Market: September

The median time it took for a home to sell was 119 days in September 2013, a 10% decline from 132 days in September 2012 and a 34% decline from 180 days in September 2011.

Foreclosures

157 trustee deeds were recorded thus far in 2013 compared to 776 total home sales reported through the HRAR MLS during the same timeframe.

Inventory

Inventory levels declined during September 2013 to 663 residential properties currently for sale, down 22 homes from one month ago, and down 35 homes from one year ago.

Pace of Home Sales: Year To Date

777 homes sold in the first nine months of 2013. This marks an impressive 22% increase from the first nine months of 2012 when only 639 homes had sold.

Home Values: Year To Date

Median sales prices increased 1.42% and average sales prices increased 2.01% for 2013 year-to-date as compared to 2012 year-to-date.

Days on Market: Year To Date

The median length of time on the market for homes selling during the first nine months of 2013 was 122 days, a 17% decline as compared to the first nine months of 2012.

Supply

The under \$200k price range is balanced (six months of supply) but all other price ranges still show an excess of housing supply, with 8, 13 and 19 months of supply available.

Price Per Square Foot

Median price per square foot of single family homes has increased to \$105/sf in 2013, as compared to \$104/sf in 2012 and \$103/sf in 2011.

Buyer Activity

96 buyers committed to buy in September 2013, compared to 98 in September 2012 -- which marks a 2% decline in buyer activity over the past year.

Single Family Home Sales

599 single family homes sold thus far in 2013, compared to a total of 641 in 2012. The median sales price has declined to \$193,000.

Townhouse Sales

178 townhouses sold thus far in 2013, compared to a 2012 total of 223 townhomes. The median townhome sales price has increased to \$143,250 from \$134,995 in 2012.

Lot Sales

There have been 60 lot sales of less than an acre in 2013, compared to 61 in all of 2012. Median sales prices have declined to \$53,500 thus far in 2013 as compared to \$56,875 in 2012.

Land Sales

51 parcels of land greater than an acre sold thus far in 2013 compared to 47 land sales during all of 2012. The median price per acre has declined to \$13,750 in 2013.

Editorial Note: In November 2012, a single buyer purchased 22 University Place condominiums for \$33K/condo from a single seller. These 22 sales were entered into the HRAR MLS as 22 separate transactions instead of as one multi-family or commercial transaction. While entering this single transaction as 22 separate sales is misleading, and skews our understanding of trends in the Harrisonburg and Rockingham County residential real estate market, these 22 sales are included in the analysis in this housing market report as of this issue.

HOME SALES REPORT

Harrisonburg & Rockingham County

October 8, 2013

# Home Sales	2010	2011	2012	2013	% Change ('12 - '13)

September	151	180	132	119	-9.85%
Year-To-Date (Jan-Sep)	134	153	147	122	-17.01%

Home Sales Strong, Prices Slowly Increasing. The pace of home sales has improved drastically (+22%) over the past year in Harrisonburg and Rockingham County. This increase in sales activity has also led to an increase in median sales prices, which have increased 1.42% when comparing the first three quarters of 2013 to the same

time period in 2012. Homes are also selling moreq uickly than they have in the recent past, with median days on market declining 17% over the past year to 122 days. All of these indicators are signs that our local housing market is continuing to strengthen and grow as we finish out the year.

Sales and prices stronger in the City. The data tables above explores overall sales trends of properties in the City of Harrisonburg as compared to Rockingham County. Don't mind the drastic swings when only comparing one month of data, as the sample size is quite small -- pay more attention to the Year-To-Date indicators noted above.

You will note that the City has seen a 26% increase in YTD sales as compared to only a 19% increase in the County. Furthermore, median sales prices have increased 1.38% in the City, as compared to a 1.55% decline in the County. Homes in the City (116 DOM) are also selling slightly faster those than in the County (124).

October 8, 2013

September 2013 another month of strong improvement over 2012. Every month thus far in 2013 (with the exception of March) has shown a significant improvement in the pace of home sales as compared to the same month last year. September 2013 home sales (79) improved 18% over last September (67) --- contributing to

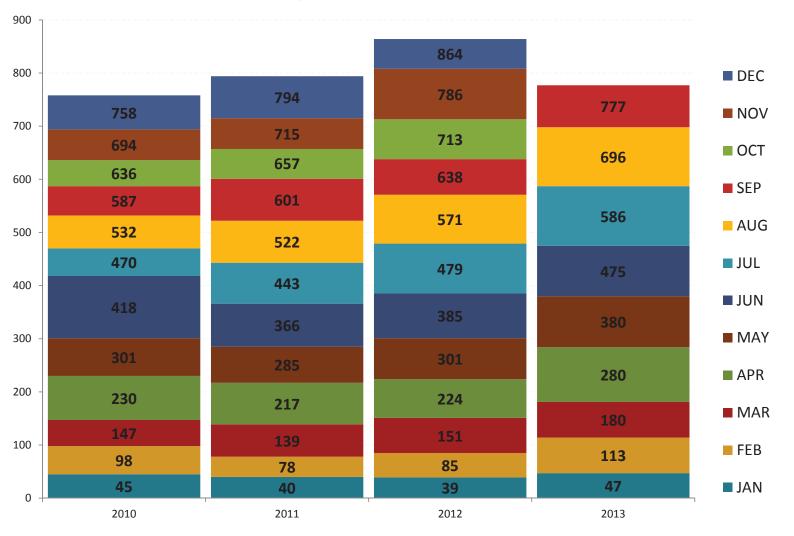

an overall, year-to-date 22% improvement in the pace of local home sales. If last year is any indicator, we should see a slight uptick in home sales during October as compared to September. Last year, however, there were an enormous amount (95) of homes sales in November -- only time will tell if we will see that again this year.

Buyers Per Month Commiting to Buy Properties 160 143 140 114 116 120 107 104 104 103 102 100 98 100 96 96 93 93 90 88 87 86 84 84 80 76 74 69 69 67 62 60 59 60 56 51 40 40 20 890 contracts 1,021 contracts 1,161 contracts 0 Sep-10 Oct-10 Nov-10 Dec-10 May-11 Jul-11 Aug-11 Jan-12 Feb-12 Mar-12 Apr-12 May-12 Jun-12 Jul-12 Aug-12 Sep-12 Oct-12 Nov-12 Jan-13 Mar-13 May-13 Jun-13 Jul-13 Aug-13 Sep-13 Jan-11 Feb-11 Jun-11 Sep-11 Oct-11 Nov-11 Dec-11 Dec-12 Feb-13 Apr-13 Mar-11 Apr-11

Harrisonburg & Rockingham County

Strong Buyer Activity in 2013. The number of buyers contracting to purchase properties in Harrisonburg and Rockingham County declined slightly (-2%) when examining only September data. Looking at an entire year's worth of data, however, we see that the annualized rate of contract signing has increased 14% over the past

year from 1,021 contracts to 1,161 contracts. We are likely to see relatively strong contract figures in October as well before buyer activity drops off somewhat in November, December and January.

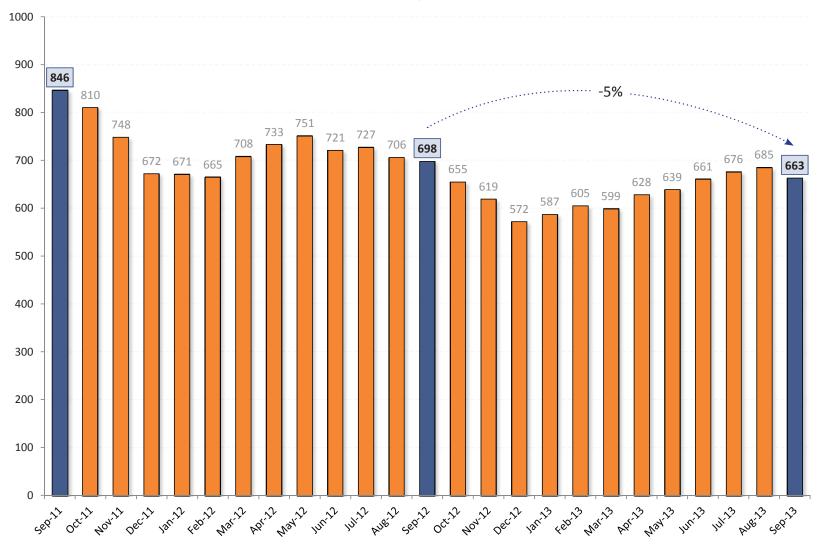

Harrisonburg & Rockingham County Monthly Cumulative Residential Sales

2013 will easily break previous home sales highs. This graph shows the month by month cumulative count of residential sales in Harrisonburg and Rockingham County. Last year's home sales (864) exceeded 2011 home sales (794), and this year, January through September are performing tremendously well (777 sales) as

compared to previous January through September sales. At the current pace we should easily surge past 900 home sales this year, possiby up to 950 sales, as we have already surged past the first ten months of sales in 2012 with only the first nine months of sales in 2013.

Harrisonburg & Rockingham County

Inventory Levels

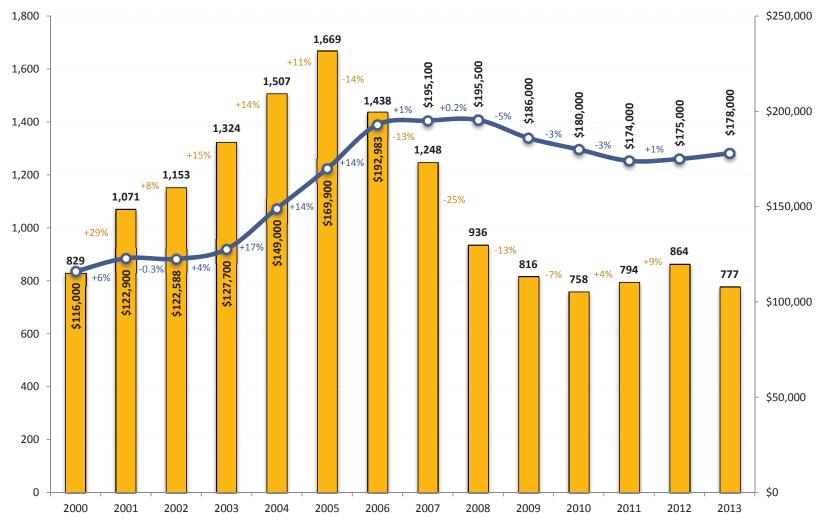

Inventory finally enters normal seasonal decline. Typically, inventory levels decline from July through December as homes are selling and fewer sellers are putting their homes on the market. That did not happen this year until this past month (September) but we are now starting to see inventory levels decline. This delayed

decline in inventory levels is likely a sign of returning enthusiasm amongst sellers that our local housing market may be starting to (at last!) improve, making it more viable for them to list their property for sale again.

Harrisonburg & Rockingham County

Home Sales & Price Trends

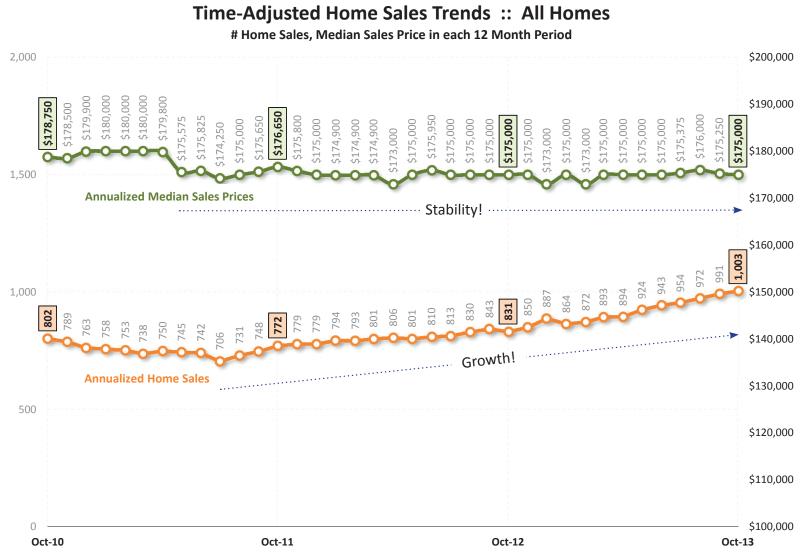

Single Family Homes & Townhomes

Buyer activity increasing; home prices slowly improving. This graph provides an overall indicator of the state of our housing market, showing both the number of homes being sold each year since 2000 (yellow bars) as well as changes in the median sales price during the same time period (blue line). After five years of

declines in home sales (2005-2010) the pace finally picked up in 2011 (+4%) and 2012 (+9%). Home values (as measured by median price) increased (slightly) last year to \$175,000, up from the 2011 median price of \$174,000. Year-to-date median prices have risen even further thus far in 2013 to \$178,000.

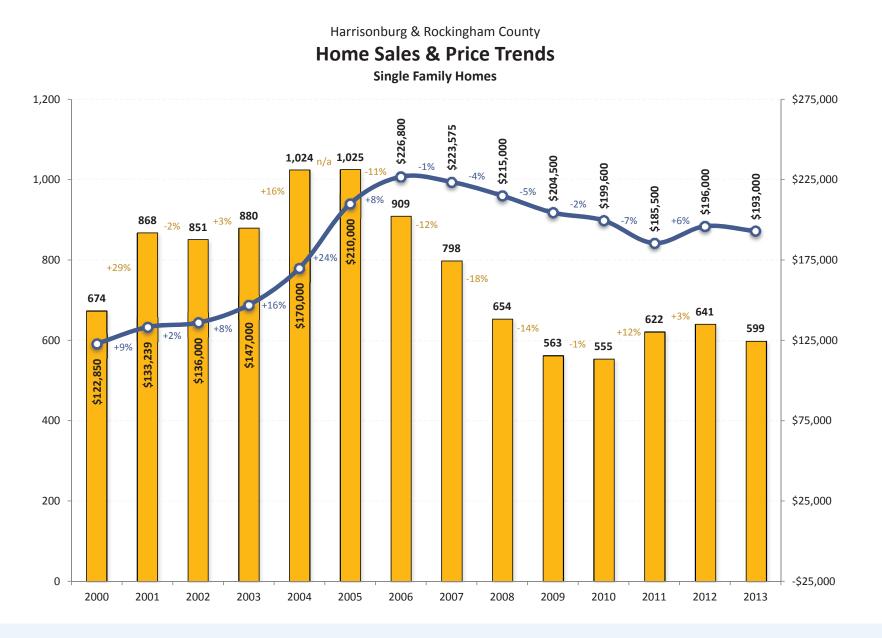

HarrisonburgHousing today.com

Harrisonburg & Rockingham County

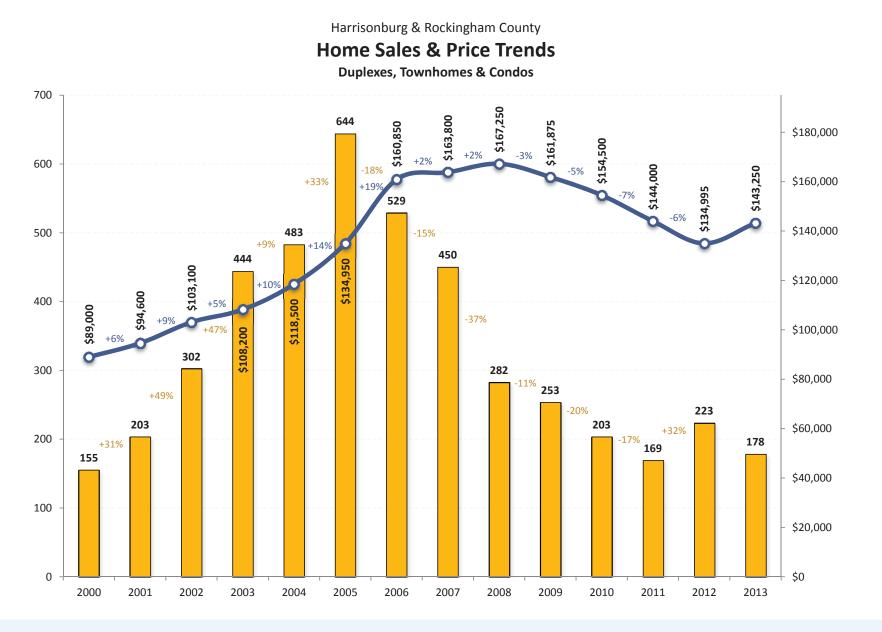

Increasing sales pace; stable sales prices. This graph shows a rolling 12 months of the number of home sales in the Harrisonburg and Rockingham County area, as well as the median price of the homes that sold during these time frames. Each data point shows one year's worth of home sales, which eliminates the volatility

of evaluating sales figures on a monthly basis. The annualized pace of home sales continues to climb (up to 1,003 now from 706 just 27 months ago) to its highest point in the past three years and median sales prices continue to stay steadily around \$175,000 --- where they have been for more than two years now.

Single family home sales stay relatively strong. The single family home market in Harrisonburg and the Rockingham County seems to be recovering quite nicely (in most ways) compared to the overall market. In 2011, the pace of home sales in the single family home market increased by 12% -- nearing 2008 sales levels with

622 sales -- and with 641 single family home sales last year (2012), we have seen an additional 3% increase in buyer activity. Median prices of single family homes also increased in 2012, up 6% to \$196,000. The median price has declined thus far during 2013, but the remaining three months of sales data may bring it back up.

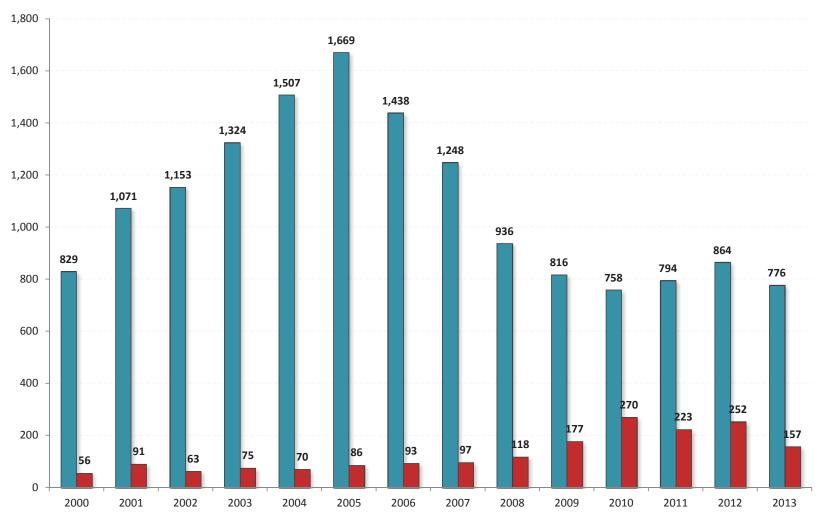

Townhouse sales picking up pace. After six years of rapid declines in the pace of townhouse sales in Harrisonburg and Rockingham County, the pace of sales finally rebounded in 2012. There was a sharp increase (+32%) in townhouse sales in 2012, which also includes duplexes and condos. This was, of course, with a significant

trade off on prices, which continued to decline in 2012 --- down 6% to \$134,995. Hopefully with more buyers in the market (some of whom are investors) we will see townhouse prices starting to stabilize this year -- this seems to be the trend thus far in 2013 with nine months of data on the books.

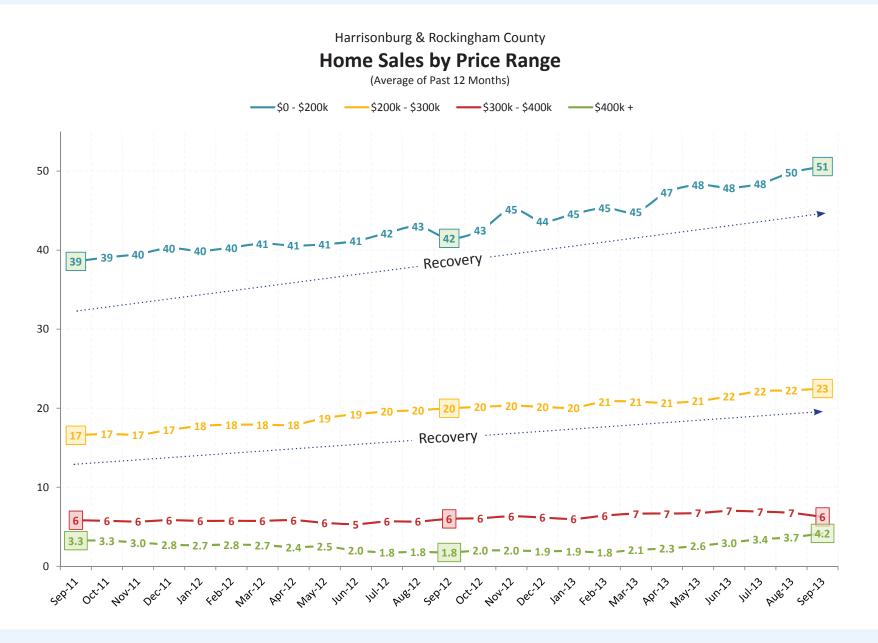

Harrisonburg & Rockingham County Home Sales vs. Trustee Sales

Home Sales per HRAR MLS
Recorded Trustee Deeds

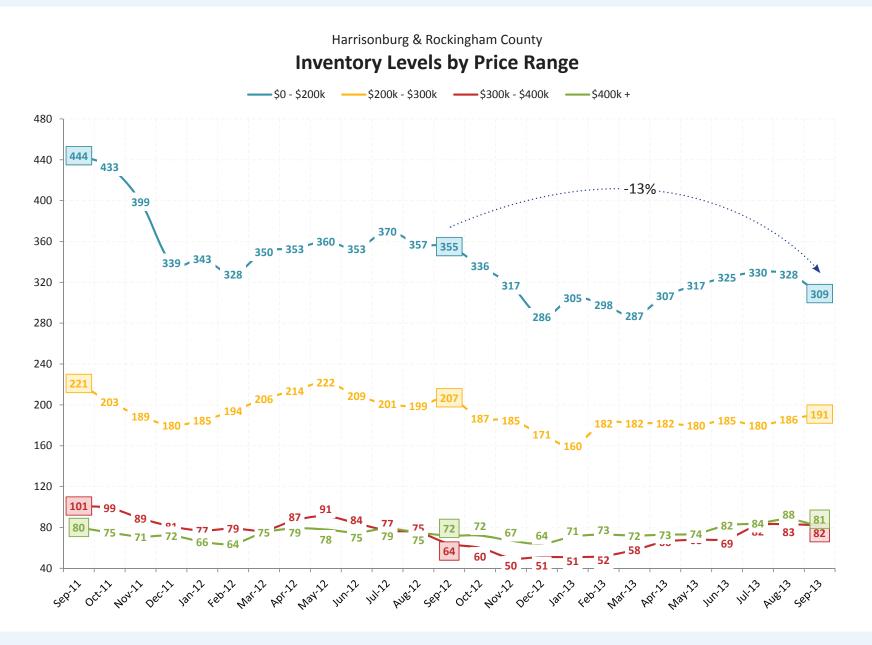

Foreclosures down in 2013. The graph above is a comparison of two imprecise measures -- but the comparison can still be helpful. The blue bars show the number of home sales recorded in the HRAR MLS -- this does not include private sales (without a Realtor), nor new home sales directly from a builder. The red bars show

the number of Trustee Deeds. Some foreclosed properties then show up again as REO properties. The foreclosure rate in 2013 is definitely lower as it was in 2012, as there were 3.4 times as many home sales as foreclosures during 2012 and 4.9 times as many home sales as foreclosures in 2013.

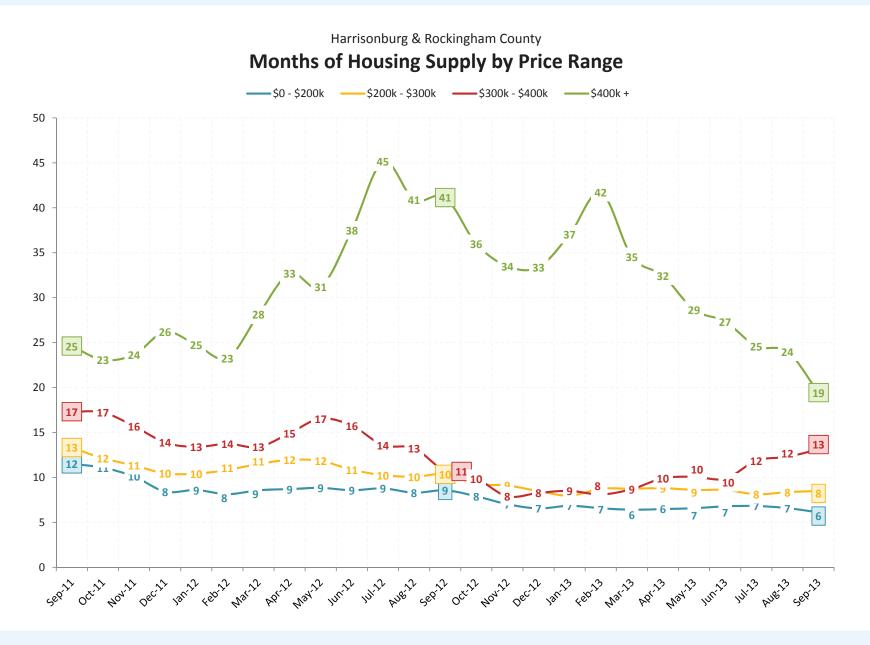

Recovery more evident in lower price ranges. The pace of home sales in Harrisonburg and Rockingham County varies significantly based on price range. The graph above shows the average number of home sales per month (given a 12-month average) as we have passed through the past two

years. Home sales under \$200,000 have increased for the past two years now, as have sales between \$200,000 and \$300,000. The pace of home sales for homes between \$300,000 and \$400,000 has stayed remarkably level, and sales over \$400,000 have increased over the past one year, but not as much over two years.

Inventory levels drop in most price segments. Inventory levels have declined in almost all price segments over the past two years, but the changes have been quite different based on list prices. Inventory levels have declined 13% in the under \$200K

price range and 8% in the \$200K-\$300K price range. Both the \$300K - \$400K and the \$400K and up price ranges have seen an increase in inventory levels over the past 12 months.

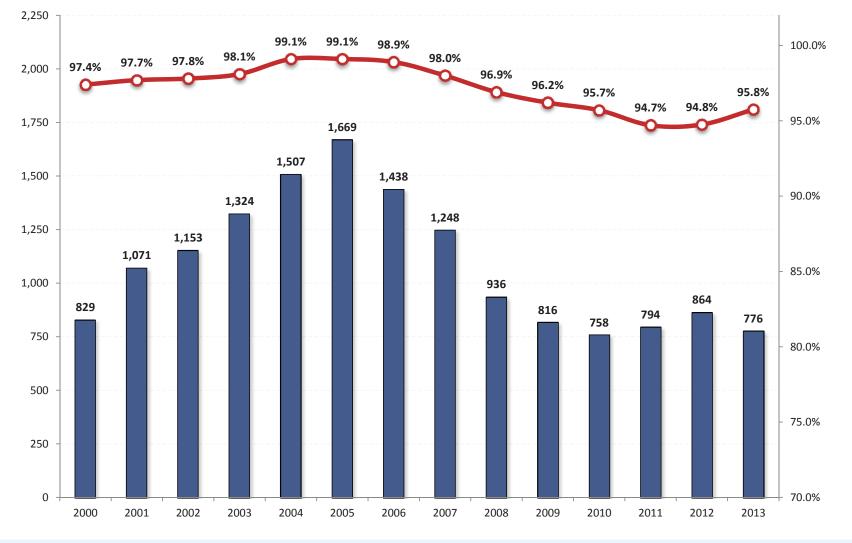

Housing supply more stable in lower price ranges. With so many homes on the market (lots of sellers) and so few home sales (not so many buyers), there are very high levels of supply in most price ranges our local real estate market. The graph above illustrates that it would take 19 months to sell all of the homes currently for

sale over \$400K if the same number of buyers bought each month as have been buying (on average) over the past 12 months. Many experts consider a six months supply of housing to be a balance between buyers and sellers, and we have finally reached that balance (at least for now) in the under \$200K price range.

Harrisonburg & Rockingham County

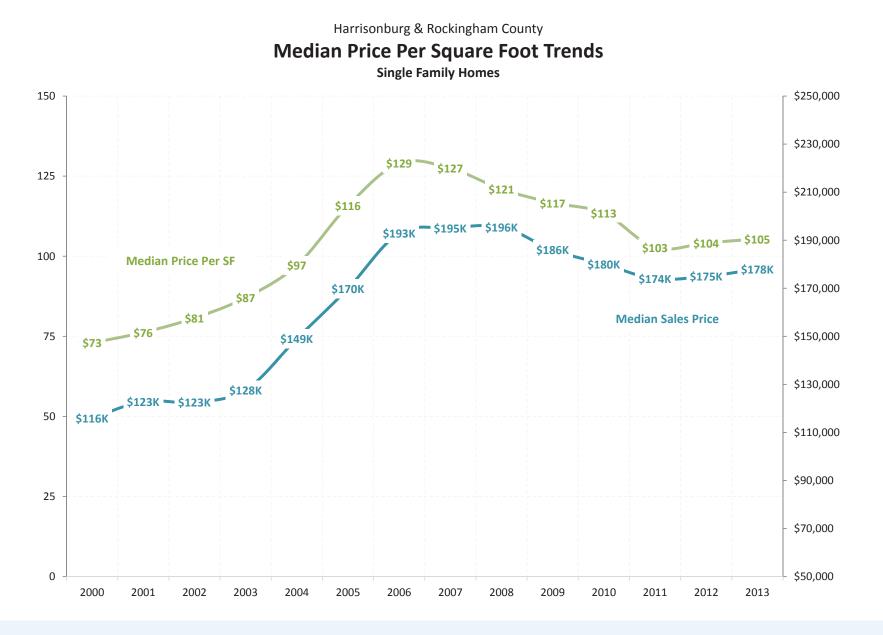

List Price to Sales Price Ratio

within the context of Home Sales Pace

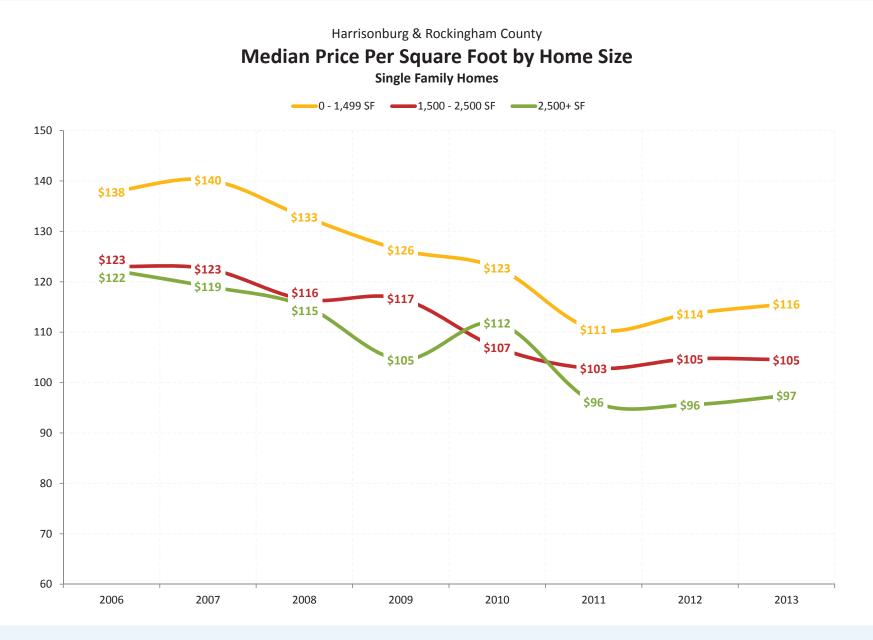

Buyers still negotiating more than in most of the past 13 years. This graph shows the average list price to sales price ratio (red line) over the past 12+ years as compared to the overall pace of home sales. At the peak of the housing boom (2004-2006) sellers were able to obtain an average of 99% of their asking price ---

up from an average of 97.4% in 2000 before home sales started escalating. Since 2011, buyers have negotiated an average of 4.2% - 5.3% off of the (last) list price of houses for sale. As the market recovers, we will likely see this ratio start to increase again as it has so far in 2013.

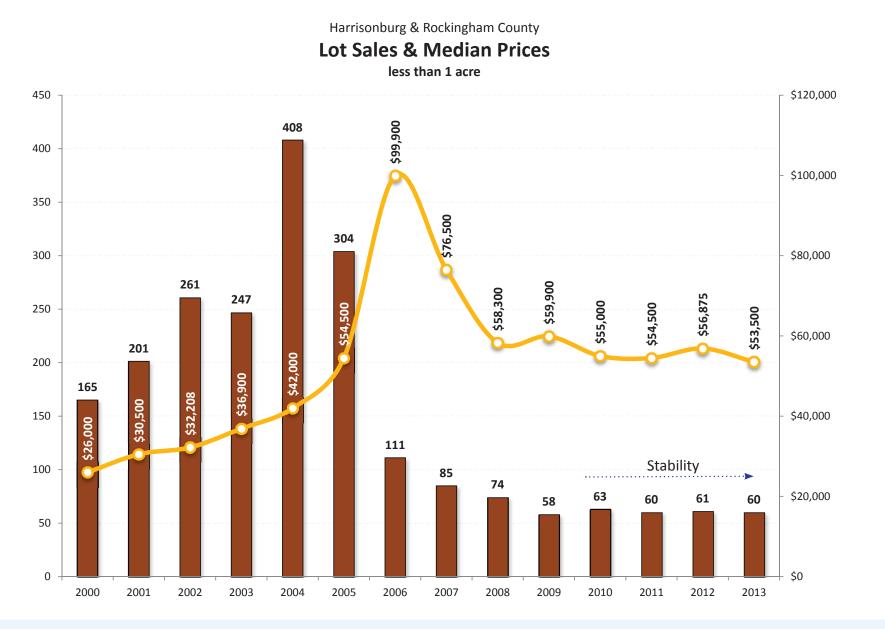

Price per square foot showing possible signs of stability. In addition to monitoring home values by overall median sales prices in our market, it can be insightful to examine the median price per square foot of homes that are selling. The graph above shows the median price per square foot of all single family homes sold over

the past 10+ years. The value trend captured by this graph is quite similar to the trend shown in the single family home median sales price during the same time, which validates that assumed set of changes in home values.

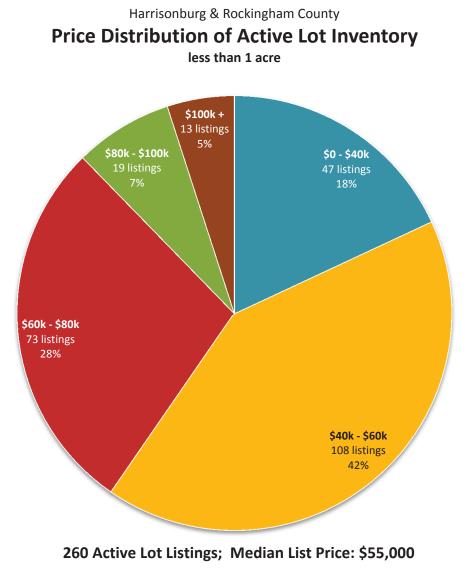

Prices decline slightly in most price ranges. Price per square foot of single family homes certainly varies for many reasons, including the age, location, lot size and structural characteristics of each home sold. However, there are some similarities in homes of a similar size. This graph illustrates that the median price per square

foot of larger homes (2500+ SF) is a good bit lower (97/SF) than homes that offer less than 1500 SF (116/SF). These values cannot be used as an absolute standard against which the value of any home can be measured, but they can provide some helpful guidance when trying to determine the value of a home.

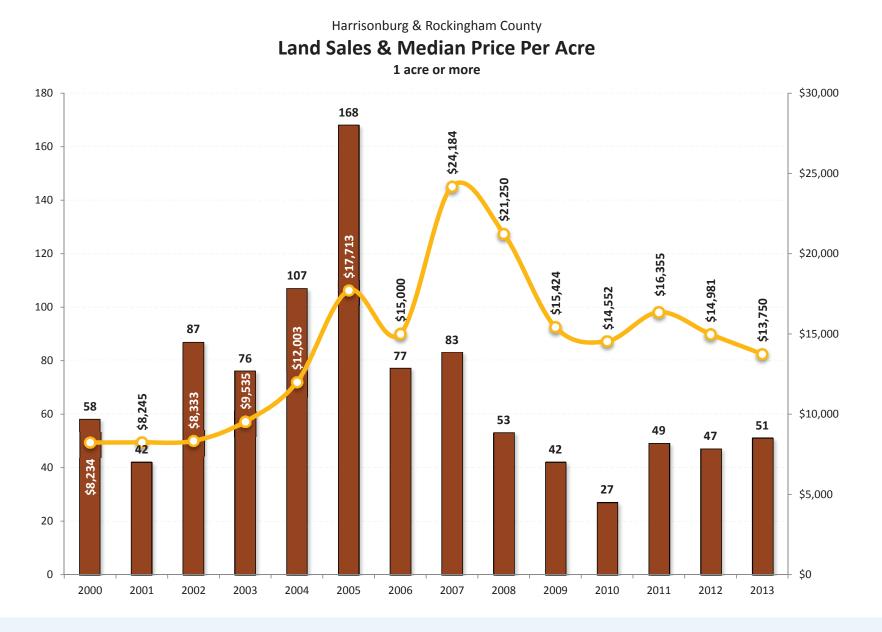

Lot sales (< 1 acre) stabilizing. While the pace of sales of lots that are smaller than an acre have plummeted since 2004 (-85% between 2004 and 2010), they may have finally stabilized. We now see that there have been between 58 and 63 lot sales

(of less than an acre) for each of the past four years (2009-2012). The median sales price of these lots under one acre also appears to be stabilizing between \$55,000 and \$60,000, aside from the \$53,500 YTD median sales price.

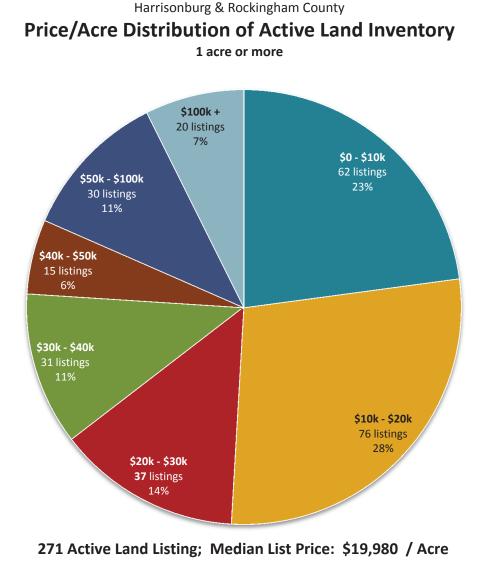

Many (many) building lots for sale. Despite the fact that only 61 lots (of less than an acre) sold in all of 2012, there are a remarkable 260 lots currently for sale. Some sanity exists in this listing market, however, as the median list price of lots for sale \$55,000 is actually a bit lower than the 2012 median sales price of \$56,875. Given

last year's 61 lot sales, if no other lots were listed for sale, it would take 4.3 years to sell all of the lots currently listed for sale. As you can see above, almost half of the lots currently listed for sale are priced above \$60,000 --- thus many sellers have offering prices higher than recent (2011, 2012) median sales prices.

Larger lot sales mostly stable between 2008 and 2012. Parcels of land larger than one acre in Harrisonburg or Rockingham County sold quite quickly in 2011 as compared to both 2010, but perhaps this was just continuing the trend of 42-53

lot sales per year seen between 2008 and 2012 (with the exception of 2010). The median price per acre of lots over 1 acre in size fell slightly over the past year to \$14,981 in 2012, and has fallen again in 2013 to \$13,750.

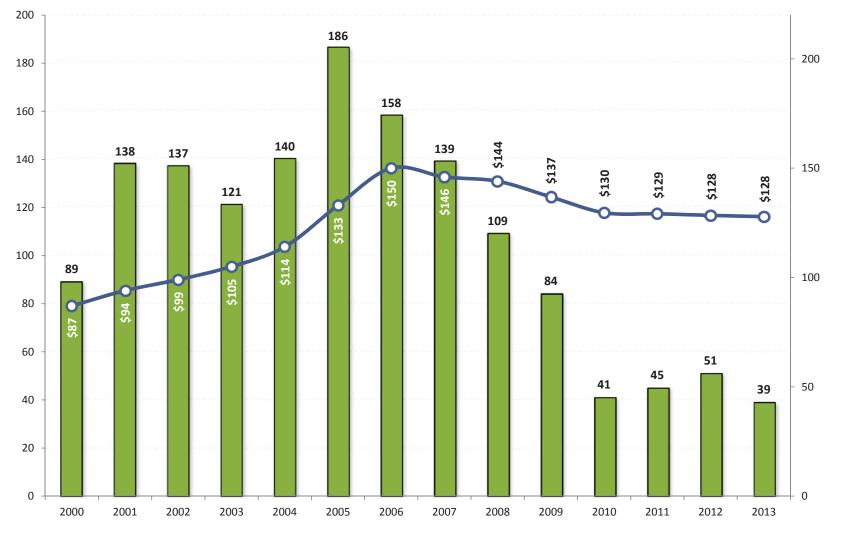

High (really high) levels of lot inventory. Despite the fact that only 47 parcels of land (of one acre or more) sold in all of 2012, there are a remarkable 271 parcels of land currently for sale. Furthermore, despite the fact that the median sales price of land is hovering around \$15,000 per acre, the median list price of the 255 parcels

for sale is currently \$19,980 per acre. Given last year's 47 land sales, if no other land is listed for sale, it would take 5.8 years to sell all of the parcels of land currently listed for sale. As you can see above, the vast majority of land listed for sale is listed at median prices per acre well above the median sales price per acre.

Harrisonburg & Rockingham County

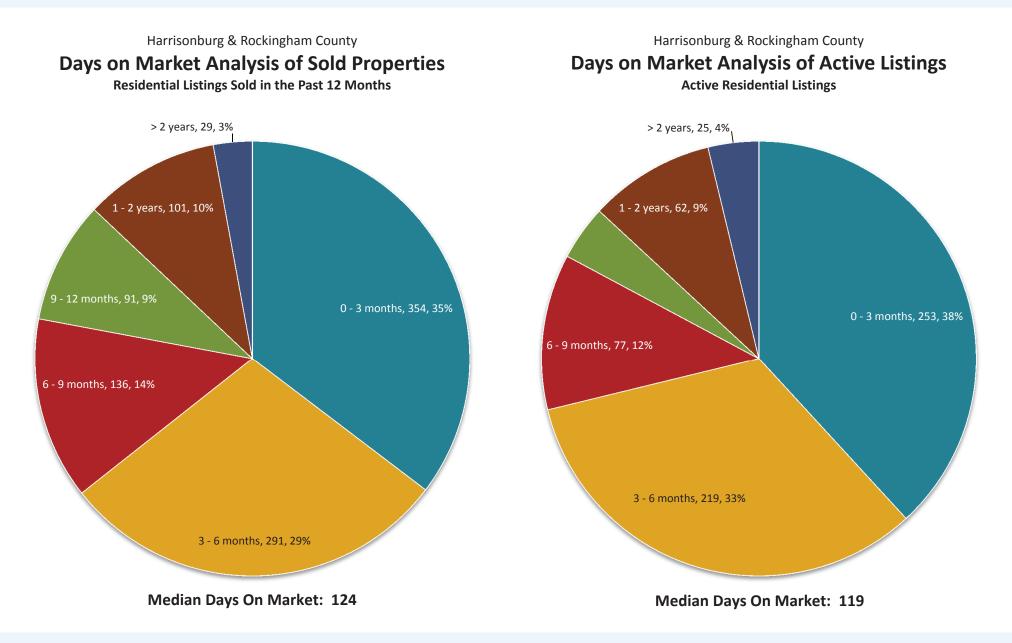

New Construction Single Family Home Sales Trends

Number of Sales, Median Price Per Square Foot

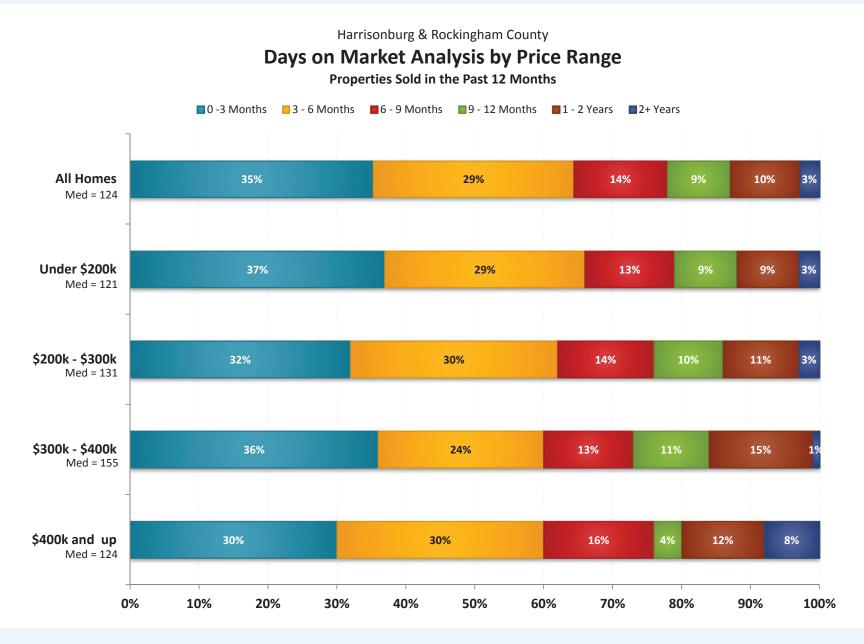

New home sales, prices relatively stable. New home builders experienced an increase in the pace of new home sales between 2010 and 2012 -- after steady declines since 2005. These increases (41 to 45 to 51) in sales pace, however, still leave plenty of room for improvement. The median price per square foot also

stablized around \$128/SF last year, down only slightly over the previous two years. As the inventory of re-sale homes slims down, the sales of new homes should continue to increase.

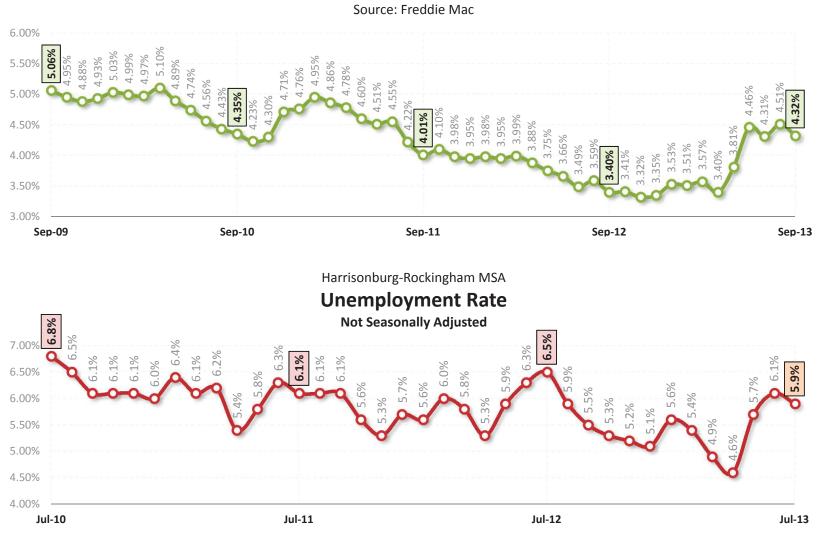

Days on market relatively low amongst many homes that actually sold. Despite high inventory levels, and low numbers of buyers in the market, the homes that are actually selling are selling rather quickly. In fact, more than 1 out of 3 homes (35%) that sells closes less than 90 days after being listed for sale. Include with that those

that close in the next 90 days and we find that an amazing 64% of homes that sell have closed within six months of first coming on the market. This is not, however accounting for the many homes that never sell -- that linger on the market, or are eventually taken off the market.

Sales pace varies by price range. The time that it takes to sell a home in today's market varies based on the price range of the home in question. For example, the median days on market for homes under \$200K is 121 days -- significantly lower

than the median of 155 days for homes between \$300K and \$400K.The difference in median values between price ranges is also indicative of market challenges for higher priced listings.

Average 30-Year Fixed Mortgage Interest Rate

Mortgage interest rates steadying, unemployment rate down. As shown in the top graph above, home buyers have seen several increases in interest rates on 30-year fixed rate mortgages over the past six months, but they have dropped over the past month from 4.51% to 4.32%. The second graph above illustrates trends in the

local unemployment rate -- which declined in July to 5.9%, which marks a 9% yearover-year decline. A stable local job market and relatively low long-term interest rates are certainly helping our local real estate market to stabilize and grow.

Scott P. Rogers, Associate Broker

Scott P. Rogers, has built a successful real estate career around providing valuable market data, insight and analysis to buyers, sellers, investors and developers. From first time home buyers to condo developers, Scott provides exceptional and comprehensive service before, during and after the real estate transaction.

Scott earned a B.A. and M.Ed. from James Madison University, providing him formal education in graphic design, management and counseling -- all of which he leverages on a daily basis to

the benefit of his clients. Scott's graphic design and web development background allows him to create and leverage high caliber technology and marketing solutions.

In 2007, Scott began providing in depth analysis and insight into the local real estate market via his real estate blog, at HarrisonburgHousingToday.com.

Scott serves on the Board of Directors for the Shenandoah Valley Builders Association, Harrisonburg Children's Museum and the James Madison University Alumni Association. Tambien, Scott habla espanol, y puede ayudar gente y familias quien quisiera utilizar un Realtor bilingue. Si usted necesita servicio en espanol, llamar a Scott. Scott puede ayudarle a comprar o vender casas.

In 2010, 2011, and 2012 Scott was recognized by the Harrisonburg / Rockingham Association of Realtors as being in the top 1% of all area Realtors.
